Southeast Asia: A Fragmented Finance Landscape

Malaysian financial landscape is greatly diverse with the presence of different mobile banking options, however this led to a highly fragmented data. Each platform provides its own transaction history, but they do not communicate with one another, enshrouding a great darkness on the user's true spending. Consumers also often face price anxiety, needing a platform to have better insights on where to buy cheaper and understanding the price trends.

Problem Statement

1

Lost Track of Money

Expected and actual spending are not same due to fragmented payments method.

EXPECTATION ≠ REALITY

Problem Statement

2

Disconnected from Price Trend

Don't understand why prices fluctuate, leaving them disconnected from market reality.

DON'T KNOW WHAT THE MARKET IS RIGHT NOW

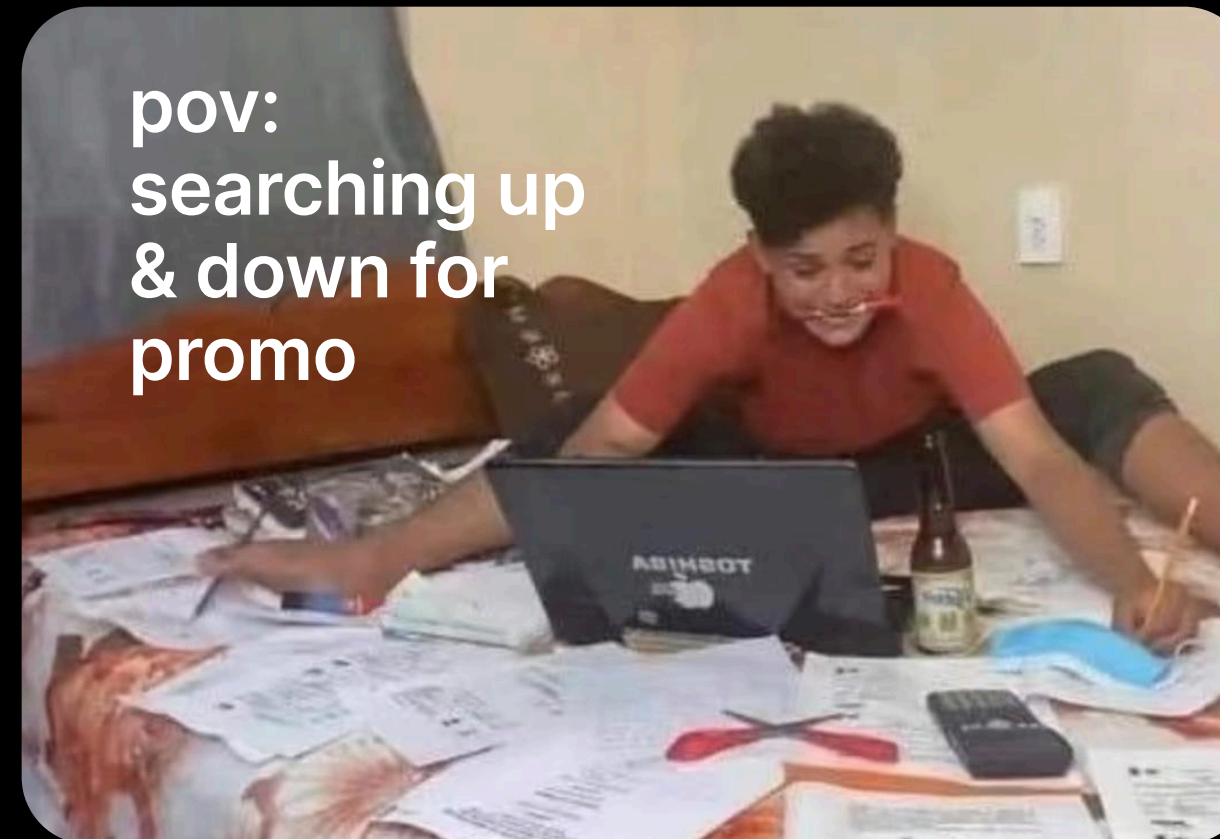

Problem Statement

3

Price Anxiety

Lack of information to make confident decisions making every purchase to become anxious guess due to lack of price transparency.

BUYING = GUESSING

Which one cheaper ?

The Solutions

Provide a Complete Picture
of Spending

Emphasize Unconscious
Spending

Connect between
Consumers and Market

Bridging Single Purchase to
Bigger Economic Picture

Increase financial
self-awareness to
make better
decision

Provide a

transaction

SDG Alignments

SDG 10

Reduced Inequalities

Core Features

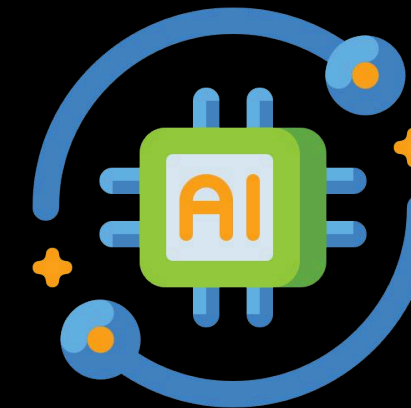

Fast Expense Capture

By voice or receipt photo, review the parsed result, and confirm it

Community Price Intelligence

Interprets the data and promotion from direct partnerships and bills upload.

AI Purchase Insights

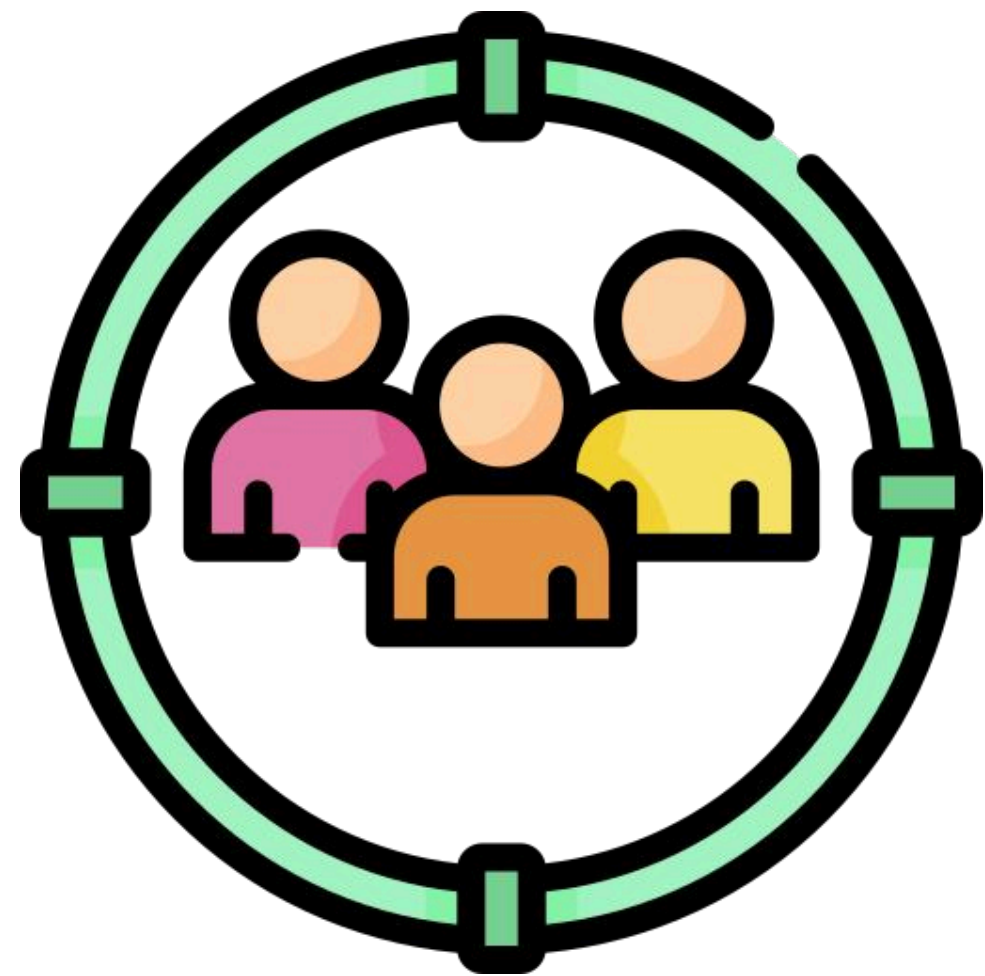

AI analyze users spending pattern, directs them to cheaper alternatives, and explains price increases through economy trends

Expense Breakdown

View and filter their recorded expenses

Target Audiences

College Students

New to finance management, try to make their allowances last the whole month

Young Working Adults

They aware the importance to track their spending but too busy to keep on doing it.

Budget Conscious Households

Households stretching every cents across shared expenses

Key Impacts

Transparent Money Flow

Help them see WHERE their money actually goes.

Enable Financial Clarity through Intelligence

AI-powered insights help users understand WHY they spend.

Empowering Smart Purchasing Decision

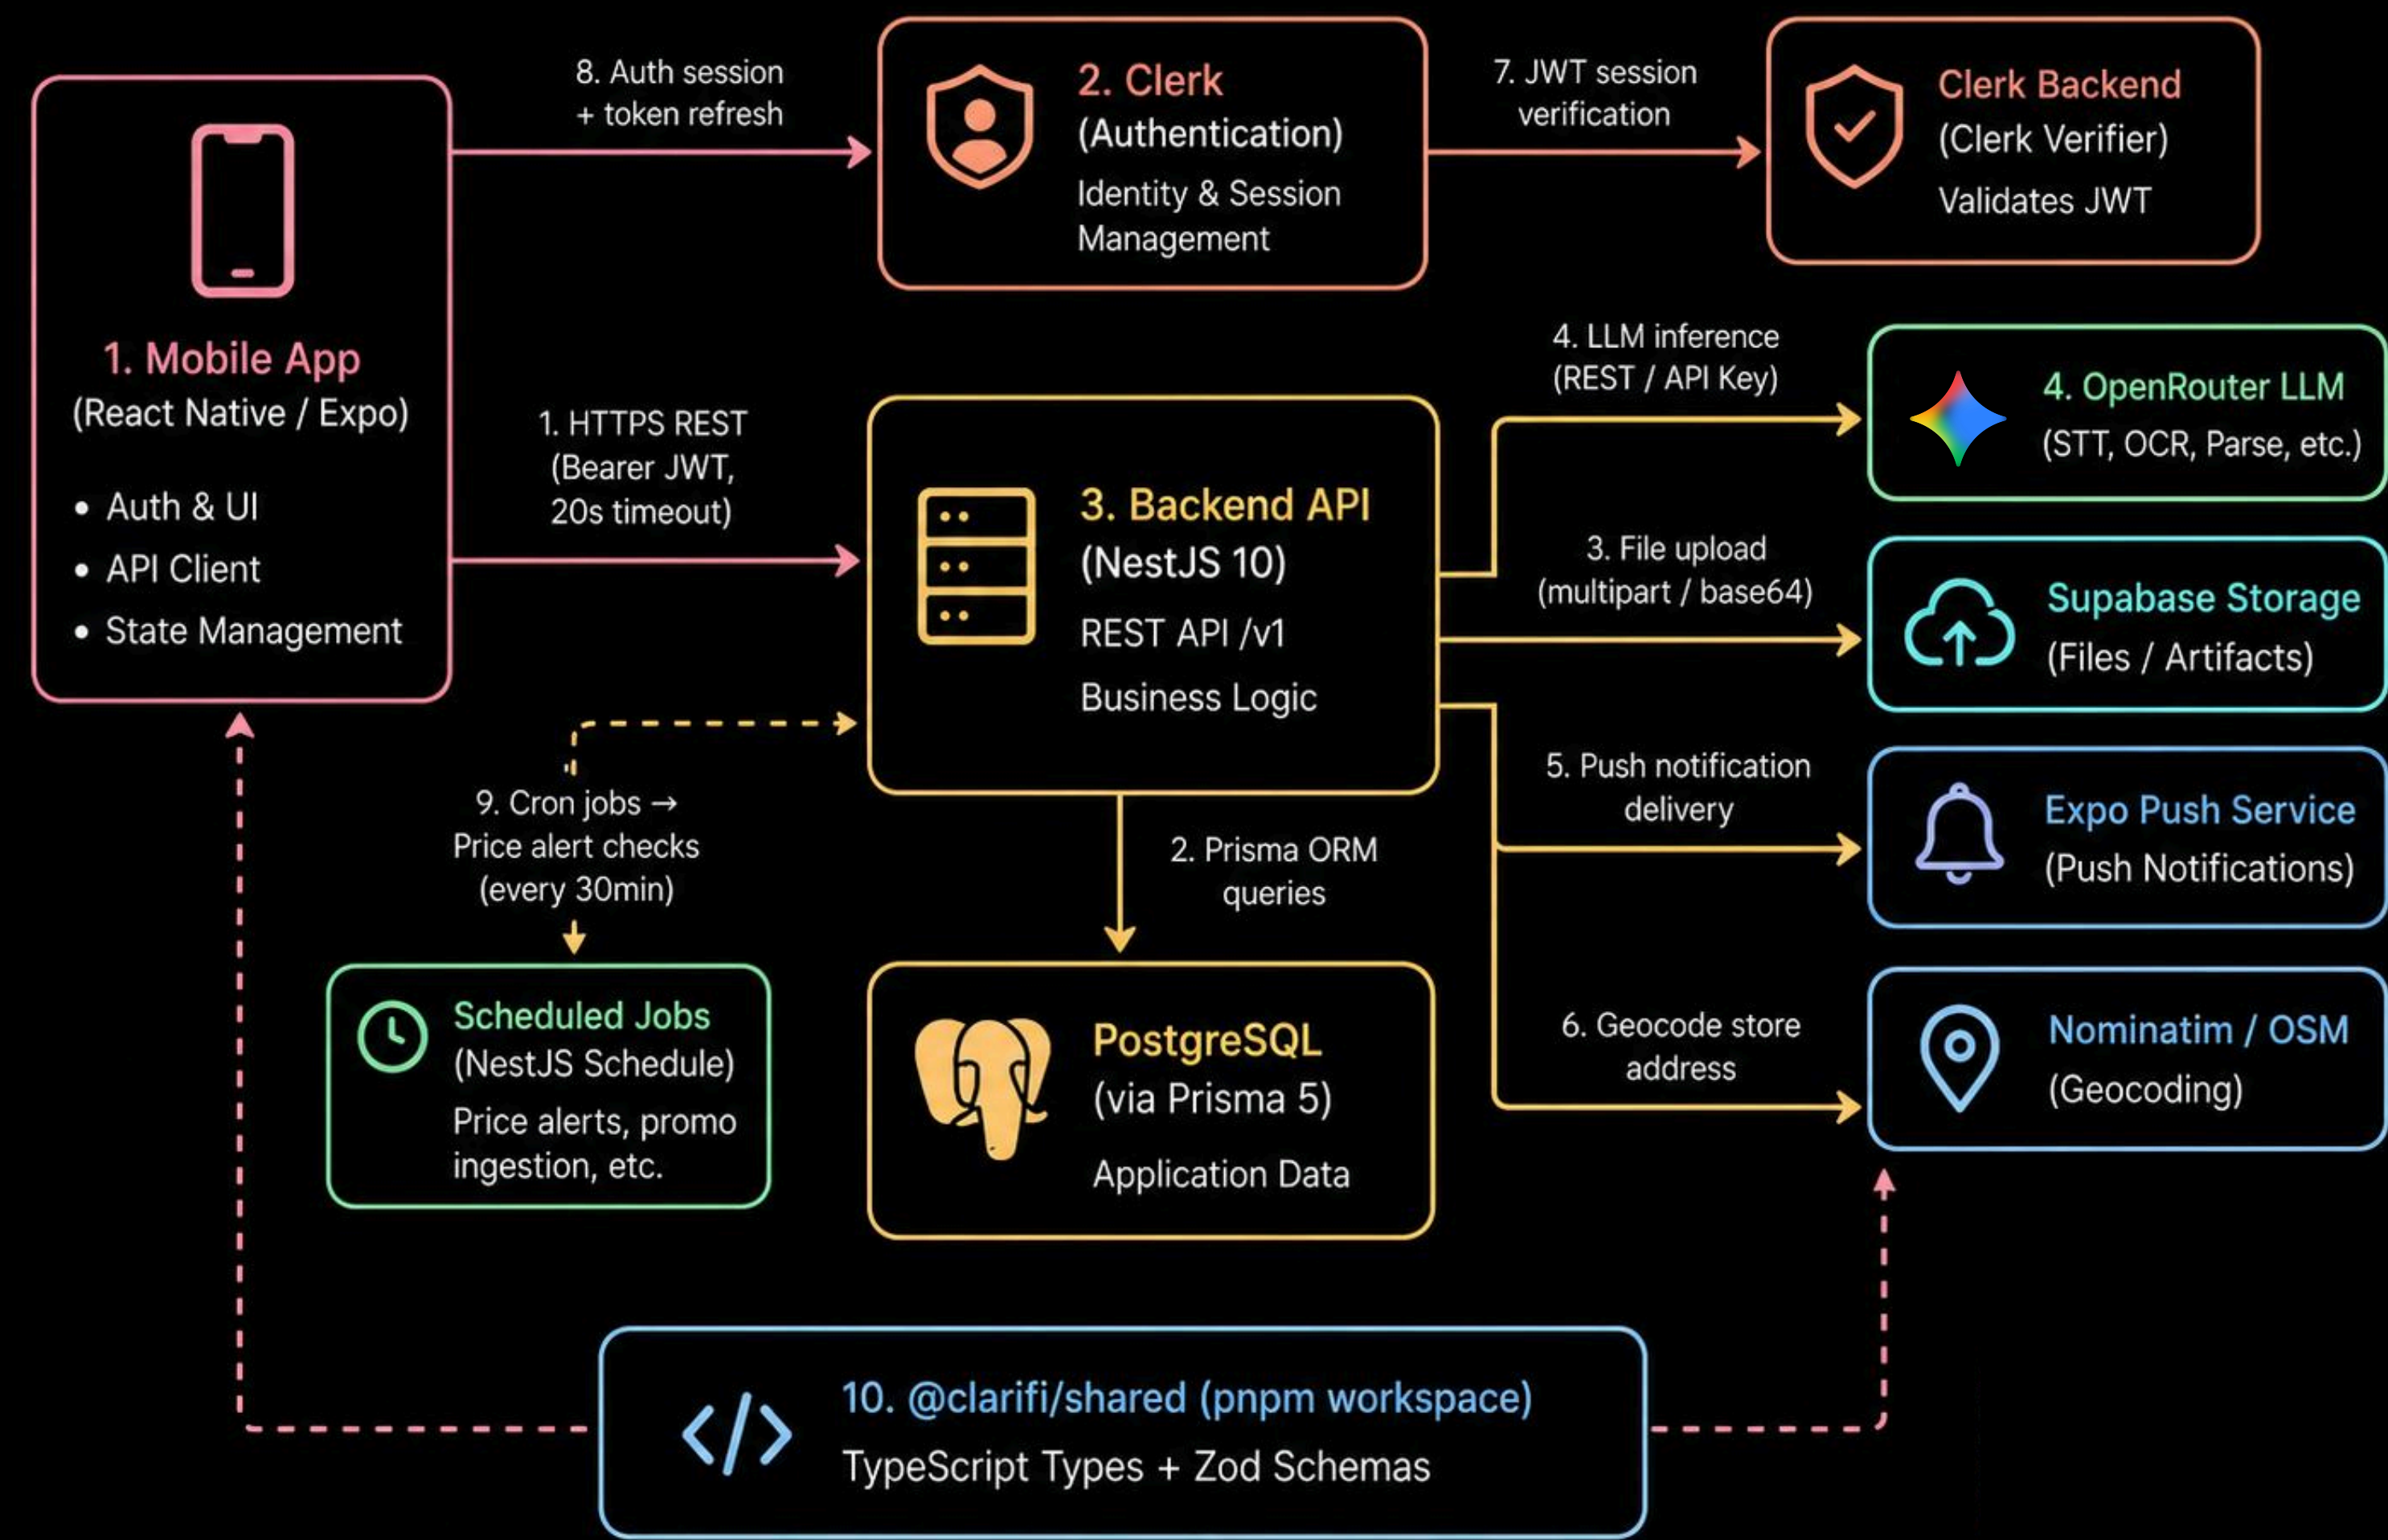

Bridge the gap between "HOW much I spent" & "WHERE I should shop"

Key Partners

Partnership with major supermarkets to obtain accurate price data

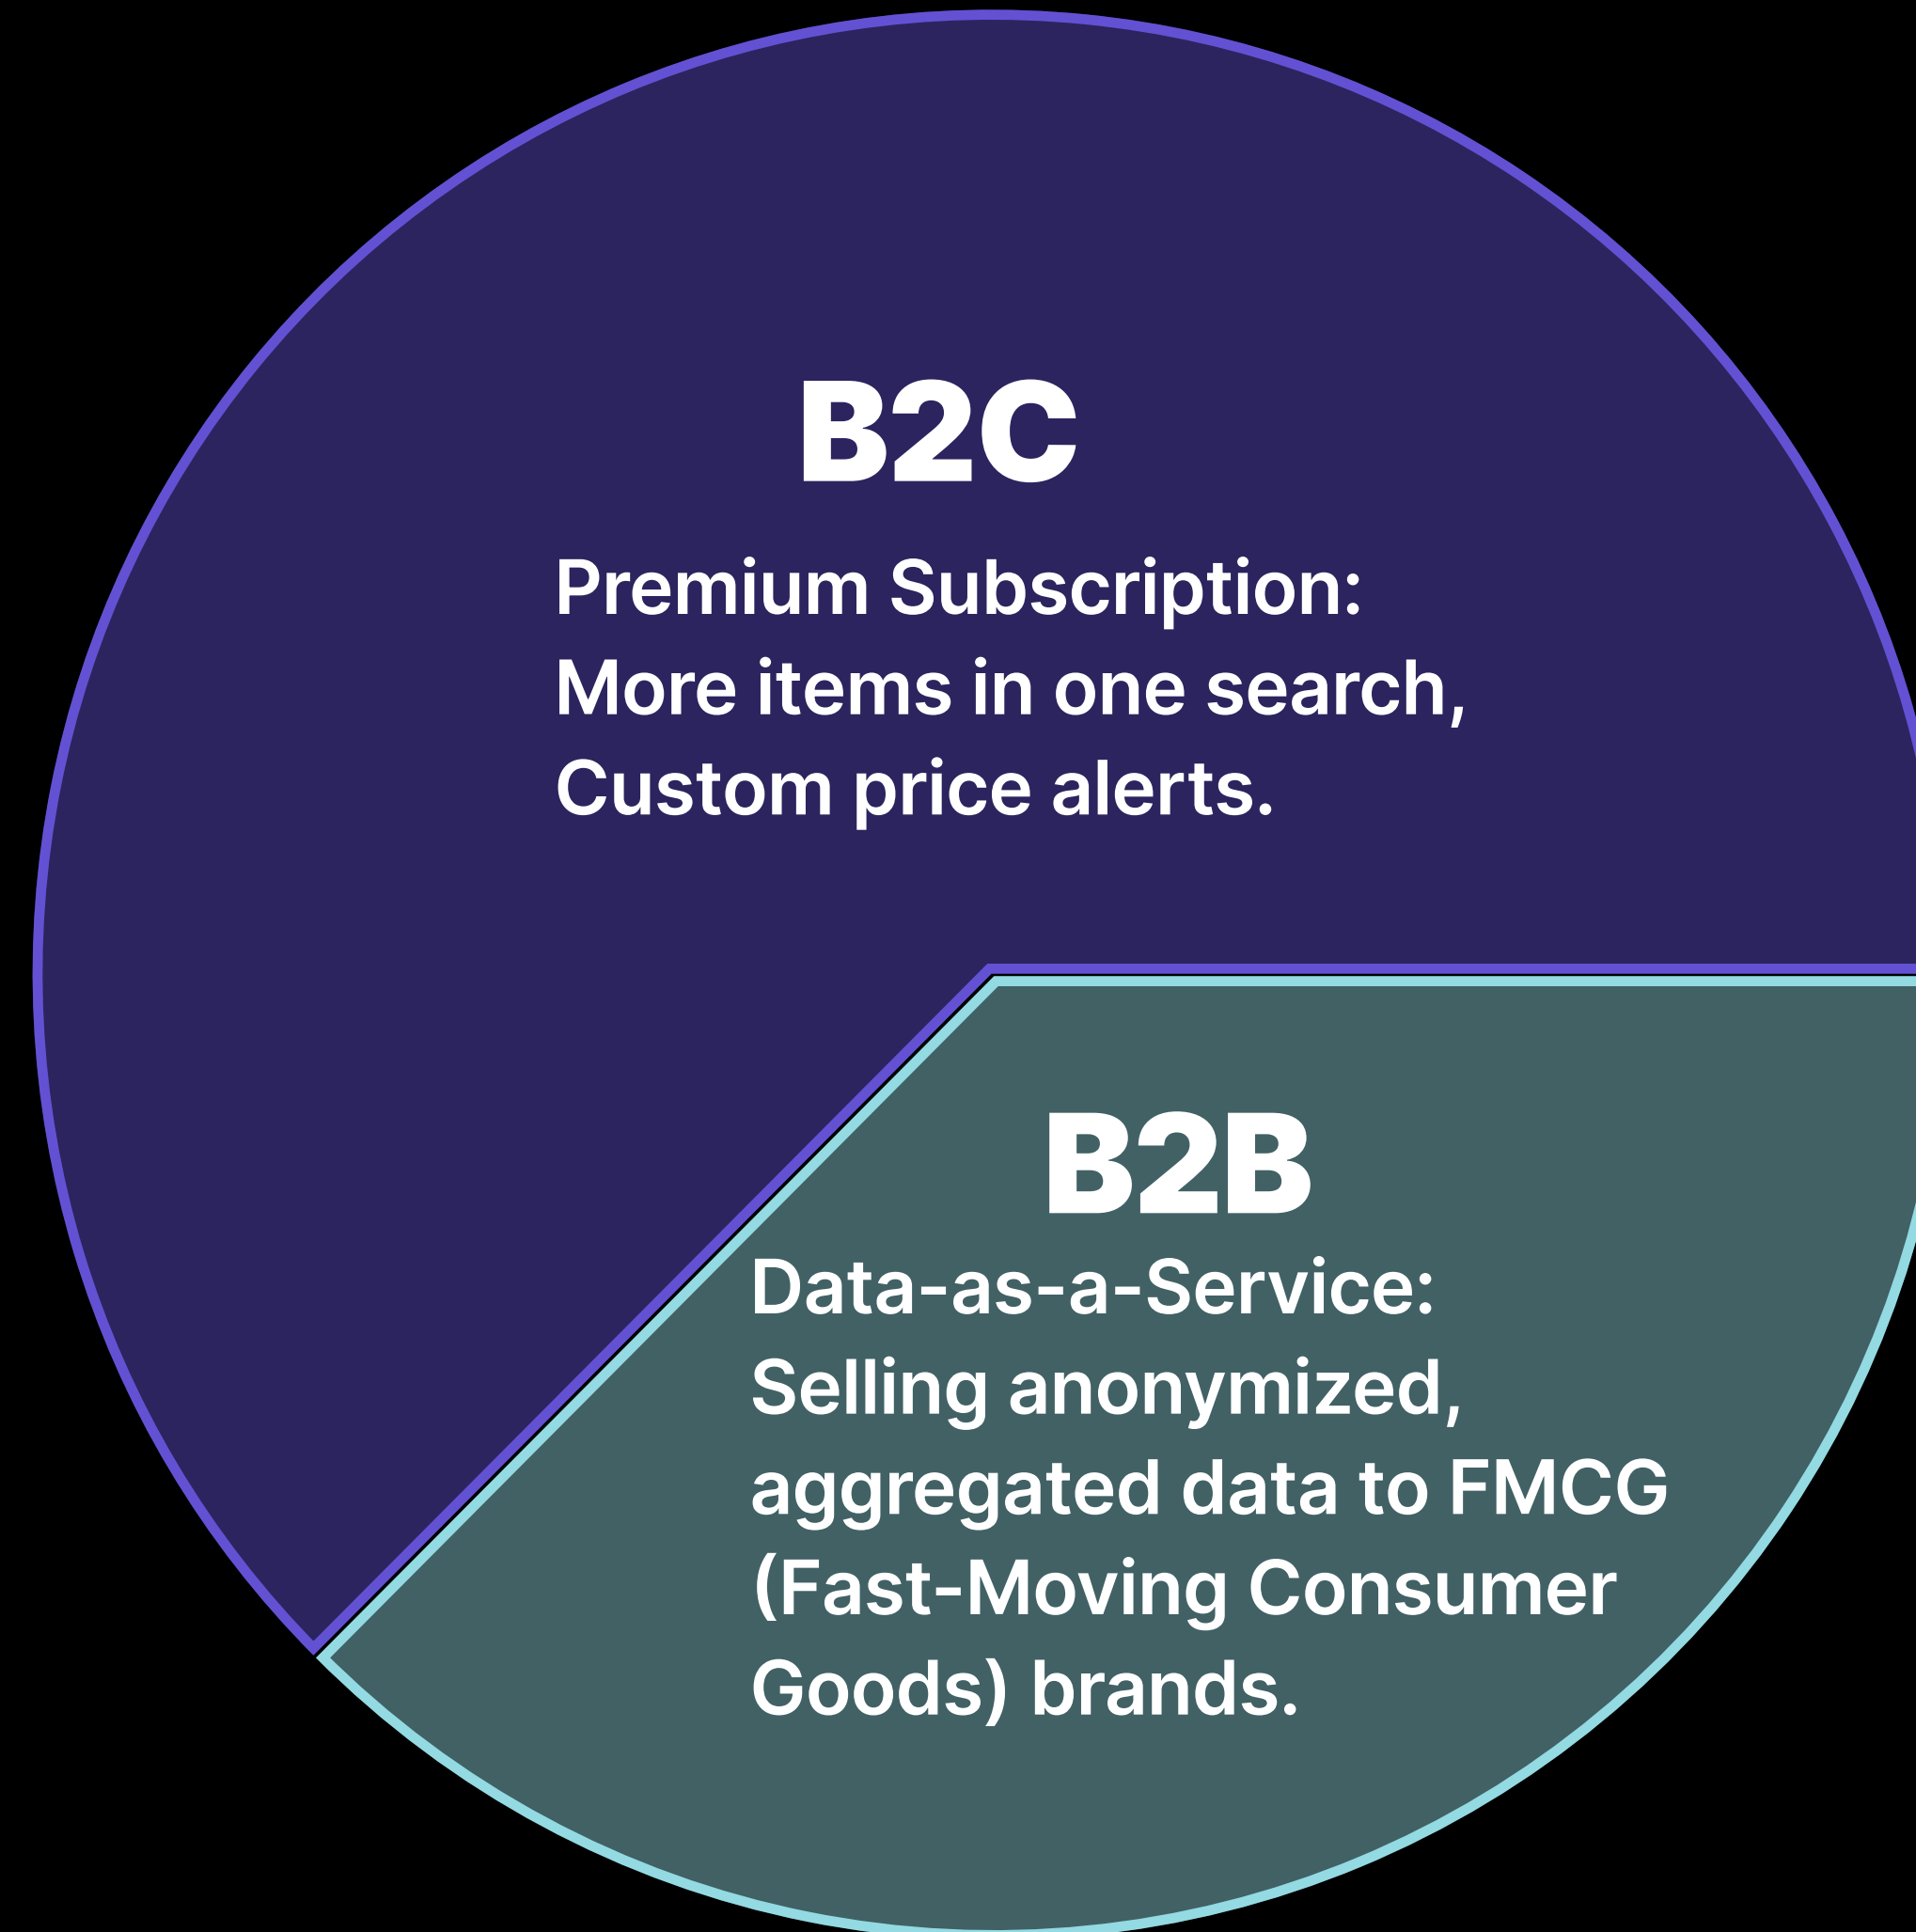

Lotus's

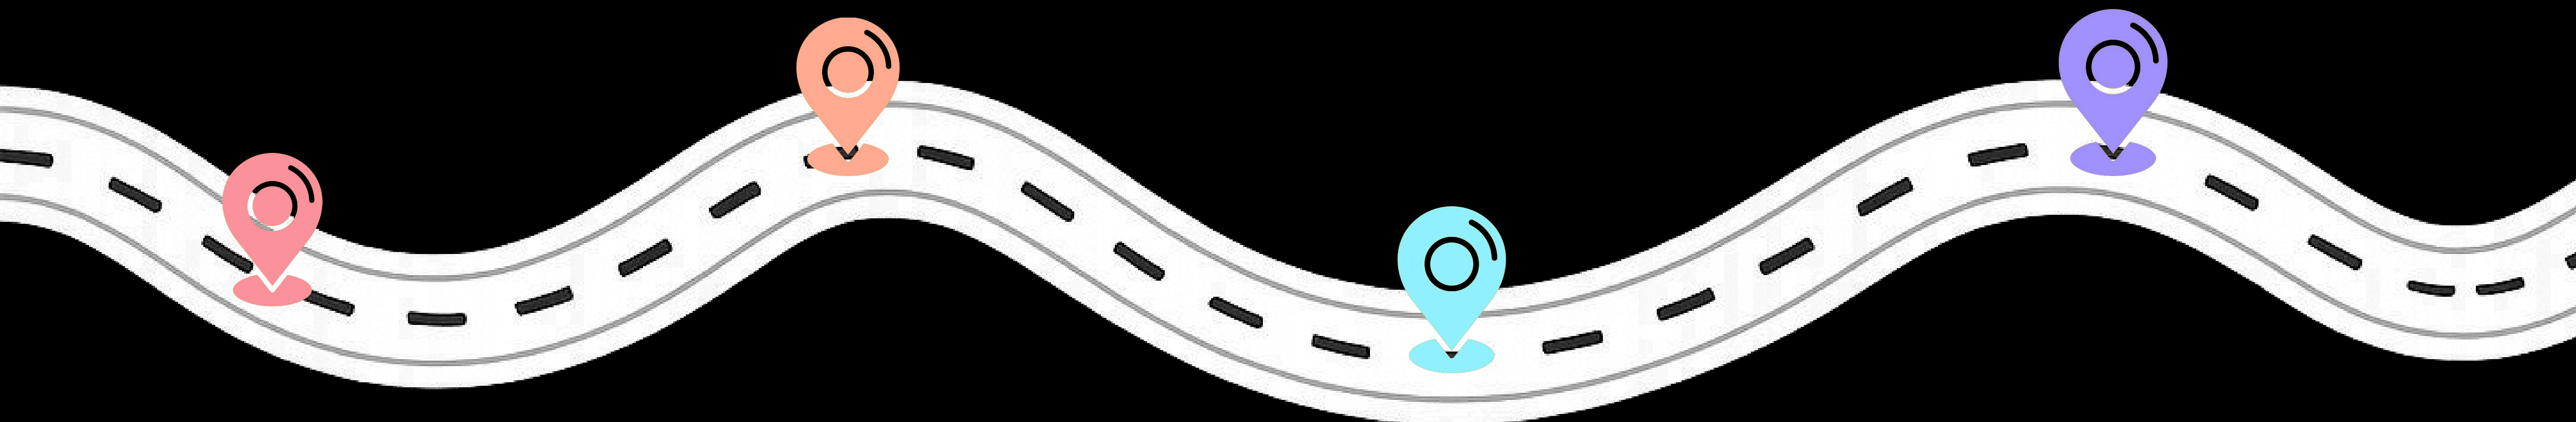

Financial Trajectory and User Growth

Revenue Streams: How we Sustain

Future Roadmap

Collaboration Month 1-3

Collaborate with major retailers such as Lotus's and Jaya Grocer to share data on prices and promotion. While we provide them brand visibility.

Community Month 3-6

Highlight better prices from neighbourhood stores and notify nearby users, helping small businesses compete digitally.

Expand Market Month 6-9

Invite the landing of major online retailers with shared data across different platforms.

App Scaling Up Month 9-Continuously

Pilot to bank in Malaysia to allow open data to link all payments platform to the user's account in ClariFi. Turning ClariFi from a simple expense tracking app to a personal finance app.
